Species Count:	1
Non-species Count:	0

Full List

Species	Count	Type	Sussex Status	Comment
Narrow-winged Grey (<i>Eudonia angustea</i>) NFY	1	Micro	Common (4398)	

Notes

You can see more details of each species from the [UK Moths website](#) by clicking on the name of the species. This doesn't apply to records at genus level or aggregates.

The Sussex Status is an **unofficial** indication of the likelihood of encountering the species in Sussex based on data sourced from the [Sussex Moth Group](#) website. The number in brackets is the minimum number of times the moth has been recorded in Sussex.

The species comments are primarily sourced from the excellent volumes of **A Revised History of the Butterflies and Moths of Sussex** by C R Pratt.
